Guidance

## Waste recovery plans and permits

From: [Environment Agency](#)  
Part of: [Technical guidance for regulated industry sectors: environmental permitting](#), [Waste recovery on land guidance](#), [Waste and recycling](#), [Environmental permits](#), and [Waste](#)  
First published: 18 October 2016

How to apply for a waste recovery environmental permit to permanently deposit waste on land.

Contents

- [Waste recovery plan](#)
- [Waste recovery activities](#)

Waste recovery is when your main aim is replacing a non-waste material you would have used in your operation with a waste material that performs the same function. That waste then serves a useful purpose as you're using fewer

# Changes to DoW Declaration

20. I confirm that: \*

**Where a project has been refused a recovery permit and/or the recipient of the soil is being paid to accept it then clients should be asked to seek further advice from the EA / NRW. The proposal may still proceed and a declaration be issued providing there is evidence the EA / NRW has no objections** (i.e. it does not regard the material to be waste and the operation to be waste disposal). Please see FAQs at [www.claire.co.uk/cop](http://www.claire.co.uk/cop) for more info.

The MMP contains the information required: The risk assessment assesses human health and environmental risks in relation to the proposed uses of all the materials in the MMP. The risk assessment concludes that the objectives of preventing harm to human health and pollution of the environment will be met if materials are used in the proposed manner. The Local Authority, the Environment Agency / Natural Resources Wales and other relevant environmental regulatory bodies have not objected to the proposed development / land remediation on the basis that the use of any material is likely to cause harm to human health or pollution of the environment. [This confirmation should be given regardless of whether planning consent is required for the activity. Also see paragraph 3.37 of the CoP.]. **The EA/NRW have not objected to the reuse of materials on the grounds that it a.) constitutes a waste management operation or b.) has had a previous application for an environmental permit for waste recovery refused (on the grounds that the project represents waste disposal).**

# EA / NRW Liaison

## Route /

6c. Environment Agency / Natural Resources Wales local office, lead contact and contact details: \*

Waste or Contaminated Land officer, specific to location of receiver site. Please note Sustainable Place officers are not a suitable point of contact.

15. Please list correspondence reviewed in 14.

Provide references e.g. email from - to, title, date. For EA / NRW liaison, this must be with a Waste or Contaminated Land officer, specific to location of receiver site. Please note Sustainable Place officers are not a suitable point of contact.
