

Sustainable Remediation of Brownfield Sites

A free half day seminar

6th July 2012 : 9am - 1pm

Science Complex, University of Sunderland

University of
Sunderland

The seminar will consider the sustainability of brownfield site redevelopment by evaluating: remediation, building design, construction and end-use.

Policy and the role of planners, developers and the regulators will be evaluated by reviewing the clean-up and redevelopment of a number of case study sites.

Discussion will centre on the recently released National Planning Policy Framework.

Optional trip (pm) to Elba Park housing and country park development at the Lambton Cokeworks re-development site.

To Book: Please email: fas-citycampus-reception@sunderland.ac.uk indicating whether or not you intend to stay for the optional visit. Transport to the site will be by private car and we will facilitate car sharing where required.

Organised by North East & Yorkshire Contaminated Land Forums and the
North West Brownfield Regeneration Forum and sponsored by:
